CLOUD SIMULATION MODEL CLOUD ENVIRONMENT USING CLOUD SIM

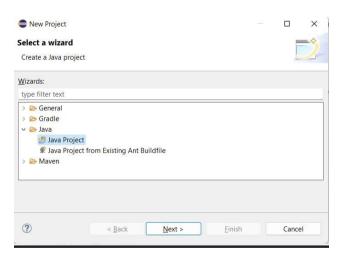

AIM:

To model the cloud environment using cloud sim tools.

PROCEDURE:

- 1. Now within the Eclipse window navigate the menu: File -> New -> Project, to open the new project wizard.
- 2. Select the 'Java Project' from the window popup and click Next.
- 3. Unselect the 'Use default location' option and then click on '*Browse*' to open the path where you have unzipped the Cloudsim project and finally click Next to set project settings.
- 4. Now select the example program from folder examples from the unzipped folder.
- 5. Run the sample program

```
1 package org.cloudbus.cloudsim.examples;
2
40 * Title:
                        CloudSim Toolkit
12* import java.text.DecimalFormat;
     * A simple example showing how to create a da
* cloudlet on it.
                                                            Finish Time
        /** The <u>cloudlet</u> list. */
private static List<Cloudlet> cloudletList
3 35.6
         /** The vmlist. */
private static List<Vm> vmList;
                                                             CloudSimExample1 finished!
         /**
  * Creates main() to run this example.
         public static void main(String[] args) {
              Log.printLine("Starting CloudSimExample1...");
             try {
    // First step: Initialize the CloudSim package. It should be called
    // before creating any entities.
    int num_user = 1; // number of cloud users
    Calendar calendar = Calendar.getInstance();
    boolean trace_flag = false; // mean trace events
                   // Initialize the CloudSim library
CloudSim.init(num_user, calendar, trace_flag);
                   // Second step: Create <u>Datacenters</u>
// <u>Datacenters</u> are the resource providers in CloudSim. We need at // list one of them to run a CloudSim simulation
Datacenter datacenter0 = createDatacenter("Datacenter_0");
                   // Third step: Create Broker
```

210701105

RESULT:

210701705

Thus, the cloud environment using cloud sim tools has been modelled.
